## #EndTB Webinar

### STRENGTHENING TB SURVEILLANCE:

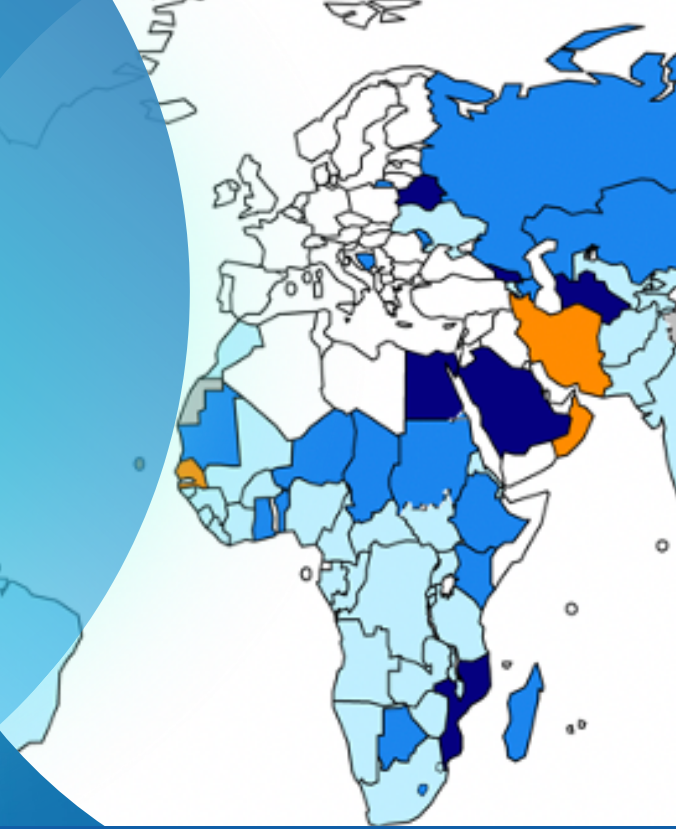

### SUPPORTING COUNTRIES TO TRANSITION TO CASE-BASED, DIGITAL SURVEILLANCE

08 JULY 2022

09:00H - 11:00H CEST / 16:00H - 18:00H CEST

VIRTUAL EVENT

\*The webinar will run twice to allow participation from all time zones

#### ABOUT THE EVENT

The World Health Organization (WHO), in collaboration with The Global Fund to Fight AIDS, Tuberculosis and Malaria and the University of Oslo, are organizing a webinar on the guidance, products and support for implementation that is available to countries to fully transition to case-based, digital surveillance systems for TB.

The objectives of the webinar are to:

- provide an overview of WHO's available, and in development products, to support transition to case-based, digital surveillance for TB;
- provide a demo of the WHO DHIS2 TB tracker for patient surveillance and monitoring of programme activities;
- share country experiences from recent implementation attempts of the DHIS2 TB tracker;
- provide an overview of support that is available to countries for the implementation of DHIS2 digital packages for TB;
- provide an opportunity for an interactive discussion between the panel and webinar participants.

The webinar will run twice on Friday 8th July 2022, 0900 - 1100h and 1600 - 1800h (CEST / GMT +2), to allow participation from all time zones. Both sessions will run in English with simultaneous translation.
